At The National College, our WakeUpWednesday guides empower and equip parents, carers and educators with the confidence and practical skills to be able to have informed and age-appropriate conversations with children about online safety, mental health and wellbeing, and climate change. Formerly delivered by National Online Safety, these guides now address wider topics and themes. For further guides, hints and tips, please visit nationalcollege.com.

10 Top Tips for Parents and Educators CREATING FAMILY RULES FOR USING DEVICES

A set of family rules agreed on with children can promote the safe, responsible use of devices like tablets, smartphones, gaming consoles and computers. By developing rules around technology, it opens the conversation regarding boundaries and expectations, ensuring a healthy balance of screentime. This guide will help you to develop an age-appropriate family agreement to suit your household.

1 WORK TOGETHER

Collaborating with children when setting rules around the use of technology is a valuable task that can encourage them to take more ownership. It's important to make rules which reflect your family and are age appropriate. Think about what you all enjoy doing online and what apps, games or devices children use most frequently.

2 AGREE TIME LIMITS AND SUITABLE TIMES

Be realistic when setting screen time limits. These can vary depending on the child's age, whether it's a weekday or weekend, and what they're actually doing online. If they're conducting research for homework, that might require more time than if they were playing games. Consider when screen time begins: does it come after chores and homework? Agree times when technology and phones must be put away.

3 ENCOURAGE HONESTY

Family rules ensure that everyone can have fun with their devices and be safe while doing so. Nonetheless, children may make mistakes as they learn to navigate the online world. Emphasise that if they ever feel worried, unsafe or upset about something they've done, sent, said or received, they should tell you immediately so you can help them resolve the problem.

4 CHARGING AND OVERNIGHT STORAGE

To ensure children get the downtime they need overnight, it's important that devices – especially smartphones – are kept in a common space, where possible. This reduces the chance of pointless late-night scrolling or sleep being disturbed by calls, messages or notifications. There are charging boxes you can purchase, or all gadgets could be charged in the kitchen overnight to avoid distractions.

REVIEW RULES REGULARLY

themselves to teasing behaviour). Explain that if they aren't treating others considerately, they might be made to stay away from their devices for a while. 8 "NO TECH" ZONES Designating spaces in the house where technology isn't allowed (for example:

Lite shown

technology isn't allowed (for example: bedrooms, bathrooms and at the dinner table) lets you keep an eye on what children are viewing and who they're communicating with. It gives you some quality, screen-free time with them, too. It also helps reduce any impulses to potentially engage with inappropriate content, as they're unlikely to do so in a common space within the home.

GOOD CHOICE

9 AGREE ON CONSEQUENCES

As a family, discuss why the rules are important: to balance their screentime, to ensure everyone enjoys gaming or interacting online, and that they are safe when doing so. Therefore, if these rules are broken, there has to be a consequence. Discuss what would be fair for certain breaches of the rules, as this can prevent a disproportionate response in the future.

Anything you agree on isn't set in stone. These rules will likely alter as children get older and the way they use technology changes. Take time to review these as a family; discuss what's working, and what isn't. Communication is key – so by doing this, you involve the child in their own online safety while promoting an open dialogue.

PASSWORDS

To protect children from inappropriate content, parents should have access to all passwords. Parents should also make it clear that they will check children's devices, should they have any concerns about their use. Emphasise that this isn't due to a lack of trust but is an extra way of keeping them safe.

Meet Our Expert

Dr Claire Sutherland is an online safety consultant at BCyberAware. She has developed and implemented anti-bullying and cyber safety workshops and policies for schools in Australia and the UK. Claire has written various academic papers and carried out research for the Australian government comparing internet use and sexting behaviours of young people in the UK, USA and Australia.
